WHAT IS FUTURE EARTH FINLAND ?

The Future Earth Finland (FES) National Committee for Global Change Research brings the global change initiatives like Future Earth to Finland. The National Committee is working to establish a national network of scientists to connect Finnish researchers with the Future Earth and other and other key international networks in sustainability sciences. The emphasis is on supporting early-career researchers in sustainability to build international connections. Through travel grants, FES enables young researchers to participate in international sustainability-related conferences. The focus areas are climate change, biodiversity, circular economy, and sustainable development.

We especially want to advertise The Future Earth – Future Earth Global Research Networks (GRNs, <https://futureearth.org/networks/global-research-networks/>), which link over 20 global networks and around 50,000 researchers worldwide. Individual networks can serve as a significant pathway to internationalization for Finnish researchers.

FUTURE EARTH FINLAND (FES) NATIONAL COMMITTEE MEMBERS

- Hanna Lappalainen, Julia Karhumaa and Markku Kulmala, University of Helsinki INAR (FES chair)
- Idil Gaziulusoy, Aalto University
- Jaana Halonen, Finnish Institute for Health and Welfare
- Hannele Korhonen, Finnish Meteorological Institute
- Jarkko Levänen, LUT University
- Kaisa Korhonen-Kurki, The Finnish Environment Institute (SYKE)
- Carmen Antuna Rozado, VTT Technical Research Centre of Finland
- Jukka Käyhkö, University of Turku
- Jouni Jaakkola, University of Oulu
- Harri Kokkola, University of Eastern Finland
- Mikko Weckroth, Natural Resources Institute Finland

A close-up photograph of several hands of different skin tones gently cupping a small, round globe covered in vibrant green moss. The globe is held in the center, and the hands are positioned around it, symbolizing care and global unity. The background is a soft-focus green, suggesting foliage.

HOW TO GET INVOLVED?

FES shares information about upcoming Future Earth conferences and events through the national university and research institute network e.g. sharing information with the coordinators of various master's and doctoral programs at Finnish universities.

We can also help you network and connect with Future Earth research networks

(<https://futureearth.org/networks/global-research-networks/>).
